

# Semi-Annual Maintenance Program

OUR PROGRAM USES A 56-POINT CHECKLIST, WHICH INCLUDES:

- Oil and oil change for the compressor
- Change of filter system
- Drawing of air samples for scheduled analysis (if on BASD program)
- Disassemble & clean condensate chambers (every 100 hours)
- CFM output flow check
- Visual inspection & adjustment of drive belts
- Inspection and adjustment of safety valves
- Inspection and adjustment of all plumbing
- Inspection and tightening of all head and cylinder bolts, etc.
- All mileage and routine labor

**10% discount on additional on-site labor, where needed**

Not included in the basic price are the purification cartridges, motor and engine maintenance, hydrostatic testing of storage tanks, if needed, or additional repair parts when necessary. The contract price does not cover additional emergency service calls.

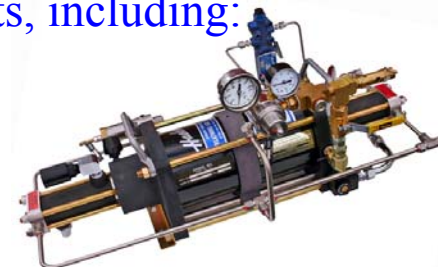

NFPA 1989 mandates an air analysis before and after a cartridge change -- this is not included as part of the Maintenance Program. See next page for details on the Breathing Air Systems *hassle-free* air analysis program.

The Maintenance Program includes two calls (billed together). Our basic coverage area encompasses:  
OH, WV, KY, IN, IL, MI, PA, FL, AL, GA, TN, MO, KS, OK, MS, MA, NH, VT, DE, MD, IA, AR, WI, VA, DC, NY, and CT.  
Other areas by special arrangement.  
Annual service can also be scheduled.

Service is available for other breathing air components, including:

- ✓ Haskel Booster Pumps
- ✓ CO Monitors
- ✓ Mobile Systems
- ✓ Cascade Systems
- ✓ Fill Stations
- ✓ Shop Compressors

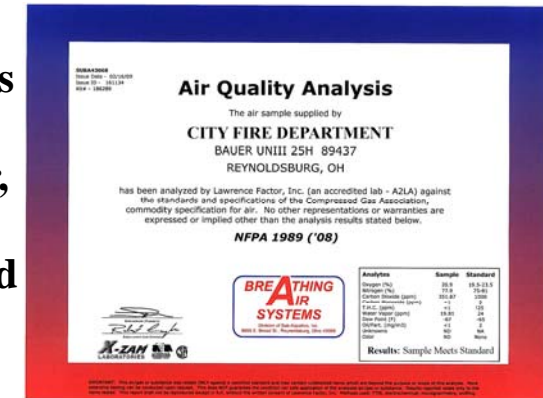

# Air Analysis Programs

*convenient, timely, hassle-free*

New in 2008, NFPA 1989 mandated an air analysis at least quarterly. With associated rules governing routine service, it may actually be six times each year, or more.

Thousands of departments nation wide have solved the problem by getting their air tested through Breathing Air Systems.

Hassle Free! Nothing to buy! No heavy cylinders required! No parts to store and misplace. And it won't bust your budget! Four times a year, or however many you contract for, you receive the test kit via UPS. All necessary adapters come with it. You collect the air sample into the sterile container, and send it off.

You will receive a certificate stating that your air meets the standards you requested. If your air does not pass, you are contacted personally, to discuss the problem and another test can be sent out once you have the problem corrected.

Our report will break down the levels of the following:

- oxygen
- carbon monoxide
- carbon dioxide
- odors
- oil vapors (hydrocarbons)
- particulate matter

Air is tested at a laboratory certified by the American Association for Laboratory Accreditation as required by NFPA 1989.

Breathing Air Systems offers a quarterly program, semi-annual, and an annual, if that fits your needs best. Plus we're always here for an emergency check.

Our standard Air Analysis Program is based around the quarterly schedule, as mandated by NFPA1989 guidelines. This also gives you your best price.

If your situation demands extra tests, they are added to the quarterly program at a discount.

**ENSURE THAT YOUR BREATHING AIR MEETS  
GOVERNMENT PURITY STANDARDS  
NFPA OSHA ANSI CGA NIOSH USN**

# Semi-Annual Compressor Maintenance and Air Analysis Programs

Assure the performance of your high-pressure breathing air compressor, increase your compressor life, reduce liability.

Be confident that your records are kept on file.

Fix small problems before they become major, costly problems.

See why thousands of departments rely on us to keep it running!

**SERVING THE FIRE AND SCUBA INDUSTRIES FOR 40 YEARS!**

We maintain most brands of high pressure breathing air compressors, including

- BAUER • MAKO • HAMWORTHY
- EAGLE • INGERSOL • COLTRI • HYPRESS

- Fulfills NFPA guidelines concerning compressor maintenance and record keeping
- NFPA compliant, no-hassle air analysis programs
- Other services available
